

Hey Parents!

As you may know, we are transitioning to meeting online with students. We are going to do this in two ways: Zoom meetings and YouTube Live Streams. I want to give you a brief introduction into setting up an account for your student.

- 1) **YouTube:** Our weekly youth group meetings will take place on YouTube Live. In order to join in, go to our youth group YouTube page ([The Rundayvoo](#)) and click the video link when it is live. If you would like to comment on the video, you will need to make a YouTube account which requires a Gmail email account.
- 2) **Zoom Meetings:** This is where we many of our small groups will meet. Hosts, I will have full access to mute students' video or audio, allow students to join the group, and the group will end when I exit the meeting. It is a safe way for our group to meet and allows us to continue to build our community.

To Join on Phone:

- Follow the link sent out via text that says, "Join Meeting."
- The link will prompt you to download Zoom. You do not need an account to join. There will be a prompt to put your name in once the meeting starts.
- Once downloaded, click the "Join Meeting" button and enter in our meeting ID found in the mass text, OR, re-click the link sent out via mass text, then click "Join Meeting."
- This will lead you to the meeting and place you in the Waiting Room until the host admits you into the video meeting.

To Join on Computer:

- Follow the link sent out via our email or on the Instagram page that says, "Join Meeting."
- A tab will open up and a download will start for the Zoom program.
- Once downloaded, a screen will pop up to prompt you to allow video and audio. Click "allow."
- This will lead you to the meeting and place you in the Waiting Room until the host admits you into the video meeting.

Note:

- All downloads are free, and you do not need to make an account if you do not want to. All you need is the link for the meeting.
- Please make sure you are able to use the audio on your device.
- You may need to manually give the app permission in your phone settings.
